

## Scott Wilson Scotland: A History

### Appendix 1: Mainly Projects

#### JP McCafferty

M8 Renfrew 1 1976

#### Introduction

**Appendix 1: Mainly Projects** includes images, memoirs, brochures, anecdotes, technical papers and other memorabilia concerning Scott Wilson Scotland projects from the earliest days until acquisition by URS in 2010. Most of the content is from my own archive, some from those who responded to my call for contributions.

Some information concerns projects involving SW Scotland staff transferred to other parts of the SW Group. I, for example, have included information about Tuen Mun Road, Hong Kong, for which I was Project Manager. Contributions concerning other overseas projects would be welcomed.

Despite many requests, no Project Description Sheets have been forthcoming! Apparently, all SW Scotland promotional material was centralised and is now 'lost!' Can this really be true?

There must be much more 'out there!' If you have any comments or contributions please let me know at: [jamesp.mccafferty@btinternet.com](mailto:jamesp.mccafferty@btinternet.com).

#### Contents and Index

There is a contents list with hyperlinks for Appendix 1. Everything is listed alphabetically and is 'searchable' from the web page.

The first item in Appendix 1 is the Project List 1960-2005 providing, among other things, Job No, Name, Project Director and Manager. The second item details the Most Significant Projects undertaken by SW Scotland.

**Papers on Projects** are listed as Project/Author in Appendix 1.

**Other Papers** are listed as Author/Title in Appendix 2.

For information and interest, some information is included for projects where Scott Wilson had minimal or no input [eg The Clyde Tunnel].
