Professional Appointments

The Scotland & Ireland Division has a history of supporting a range of institutions and professional bodies. Such involvement brings benefits to the firm by building up a network of contacts and can also be personally rewarding for the staff involved, some of whom hold positions of significant influence. The broad scope of work which the Division is now involved in is

reflected in the range of bodies our staff are associated with and there is a good spread across most, but not all, MOUs.

The Board will continue to support such involvement and would encourage all MOUs to support appropriate professional bodies.
