REBUILDING THE CAPITAL'S TRANSPORT SYSTEM

Speaker:

Bob Kiley

Commissioner – Transport for London

Chairman: Derek Turner Chairman ICE Transport Board
& Managing Director, Street Management, Transport for London

London's transport infrastructure has suffered from decades of under-investment and political neglect. Through its new regional government, London now has a coherent transport strategy which maps out how we intend to rebuild the capital's transport system. Across all modes we face the challenge of rebuilding the infrastructure and restoring reliable and high quality services. If we are to meet this challenge, then we will need to explore new ways of delivering, resourcing and managing major capital schemes and the capital's transport services.
